

# Country Profile

This is the approved revision of this page, as well as being the most recent.

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

The *Country Profile* page is unique to the Main Menu Map and can only be accessed from the main menu: click on the desired country then click **Country Profile** from the drop down. This option shows a brief portrait of various important variables for the selected country. It displays a map of the country at the top of the form followed by a list of various current values and forecasts, organized into the following categories: Population, Health, Education, Social/Human, Economy, Energy, Environment, International Politics, and Domestic Government.

The Population variables will be opened by default. To see other variables scroll and click **Choose** next to the desired set of variables or click the name of the desired set from the list at the top right of the screen. To open a graph or table of a particular variable forecast click on the graph or table icon next to the variable name.

Country Profile - Canada   IFs Version 8.36

Example of the Country Profile page, accessed from the Main Menu pop-up.

There are a few features and options to access from the menu bar at the top of the screen:

- **Continue:** Go back to the previous menu or to the Main Menu of IFs.
- **Change Country:** Choose a country to explore from the drop down.
- **Display Options:**
  - **Horizon:** Choose from the drop down to display **Forecast, History plus Forecast**, or **History (empirical)**.
  - **Scenarios:** Choose the desired saved scenario to display from the drop down.

- **Regions/Countries:** For countries with regions, choose **All Regions/Countries** or **Single Region/Country** to display the whole country or one single region. Current choice will have a checkmark next to it.
- **Use all available Historical Data:** Provide the most up to date historical data available. Will have checkmark next to it if already being used.
- **Map Source:** Display information on source of the display map.
- **Help:** Open the corresponding page in the Pardee Wiki.
