ADDITIONAL INFORMATION

For Crop and Livestock data, we are currently only looking at items with CPC codes that have "F" in front of them. TCL is the label given to trade data domain in FAOSTAT.

The following states are included in FAOSTAT countries, but we do not have them in Ifs Countries. You will need to copy and paste the data from the below dissolved states into their new states (The general rule about merging data between current states and their former dissolved states is whichever state that inherited the capital city has the right to claim data from its former dissolved state):

- China, mainland --> China
- Czechoslovakia --> Czech Republic

- Ethiopia PDR --> Ethiopia
- USSR --> Russian Federation
- Yugoslav SFR --> Serbia
- Serbia and Montenegro --> Serbia
- Sudan (former) --> Sudan

*Note: When you pull Crude Materials Nes for Import or Export Quantity, the indicator will pull twice in this same document with two different element codes (5607 and 5610). You will see countries with 1961-2021 back-to-back for each. We are looking for element code 5610, not 5907, because 5907 does not have units (which should be in Tonnes).

The following tables are how we have aggregated FAO TCL data (what is classified as Crops, what is classified as Meat):
