Fragile States Index, Fund for Peace

☐

Contents

Summary

The Fund for Peace works to prevent conflict and promote sustainable security globally by building relationships and trust across diverse sectors. Founded in 1957, FFP is an independent, nonpartisan, on-profit organization based in Washington, D.C. and Abuja, Nigeria.

The Fragile States Index (FSI) is an annual ranking of 179 countries based on the different pressures they face that impact their levels of fragility in political, social and economic terms.

FSI traces its origins to the creation of FFP's Conflict Assessment System Tool (CAST), that was developed in the 1990s as a framework for policymakers and field practitioners to be able to better understand and measure conflict drivers and dynamics in complex environments. In 2004, the CAST framework was used as the basis for the FSI, as researchers wished to determine whether state fragility could be assessed and ranked at a national level using the existing framework.
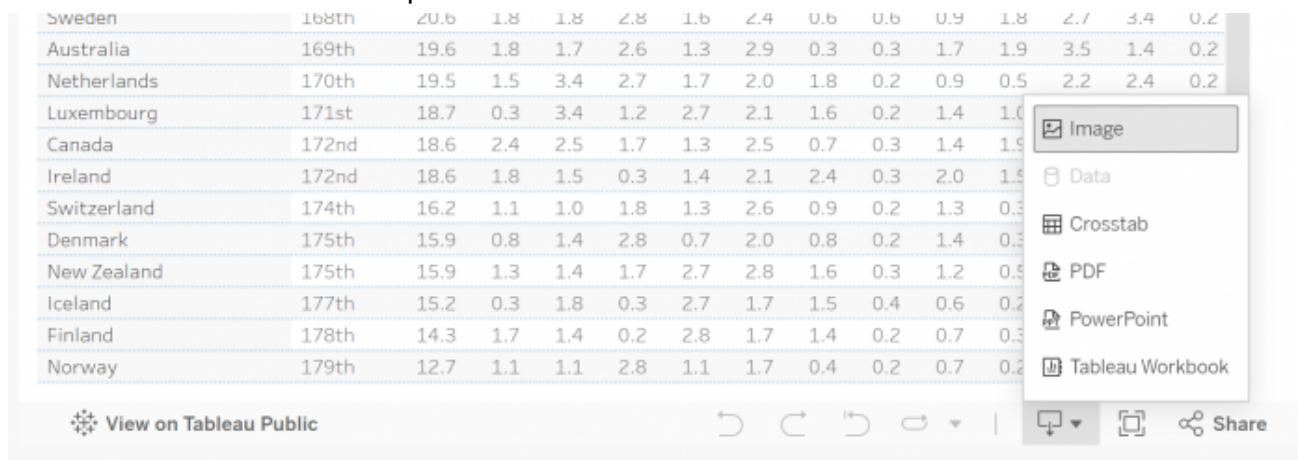

There are 12 tables currently in IFs.

Table In IFs

Variable	Definition	Ext Source Def	Years	UsedInPreprocessor
SFFFPolCrimofState	FFP Failed States Index, Indicator for Criminalization and/or delegitimization of the state, 1-10 higher is worse	Fund for Peace / Foreign Policy Magazine	2005-2015	0
