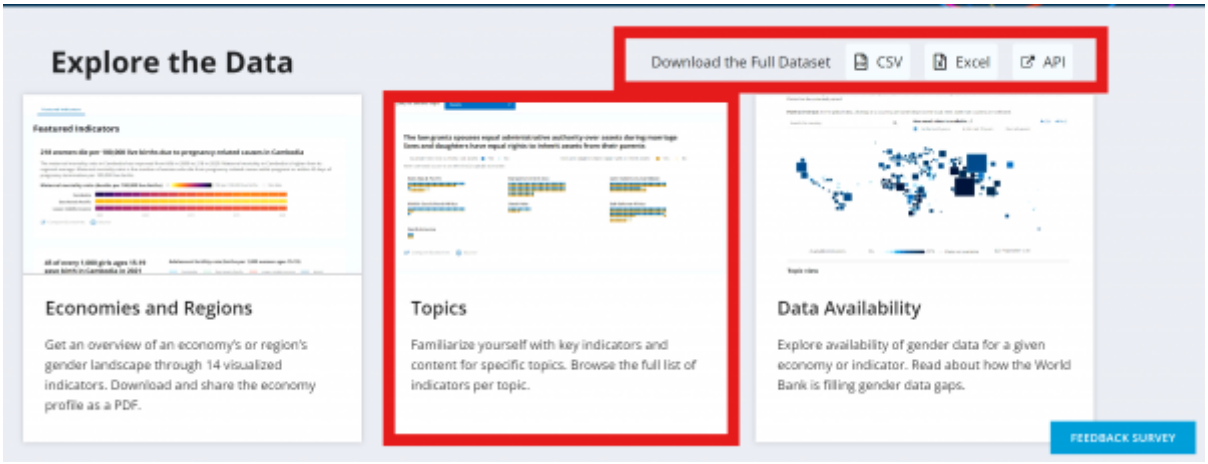
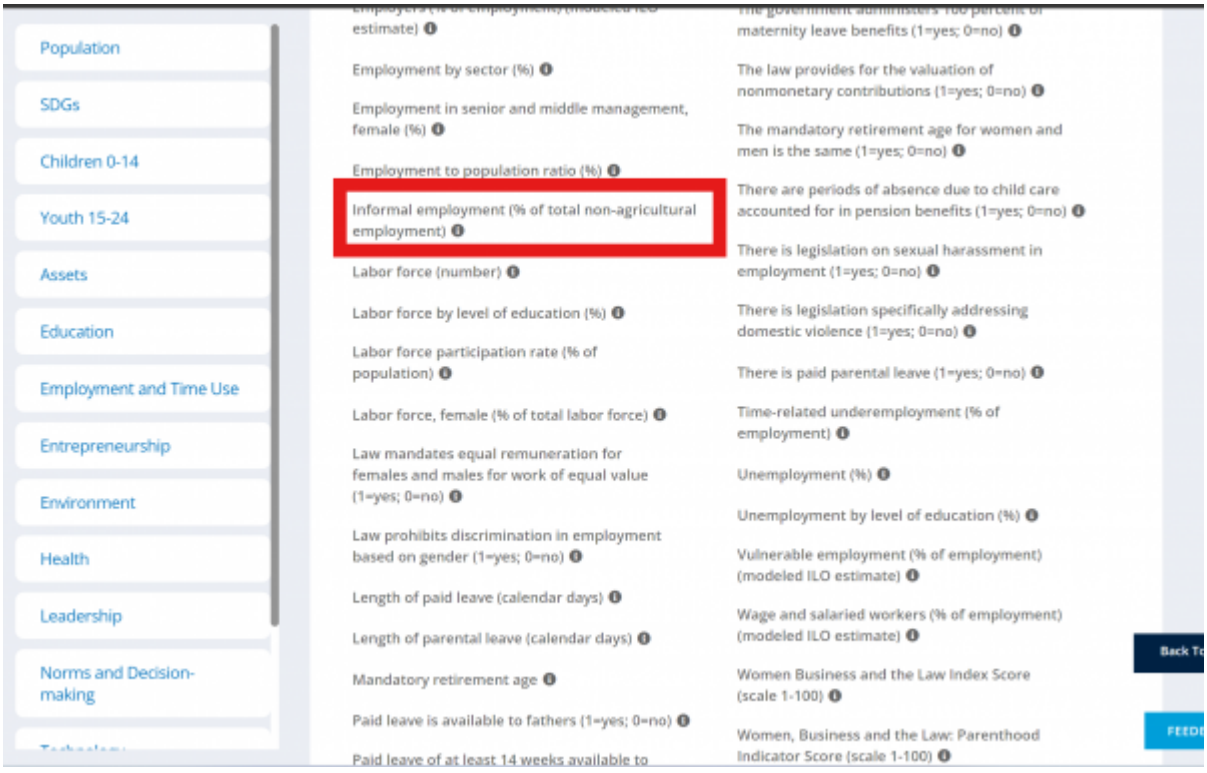
GenderUnpaidDomesticWorkTimeMale	Proportion of time spent on unpaid domestic and care work, male (% of 24 hour day).	The average time men spend on household provision of services for own consumption. Data are expressed as a proportion of time in a day.	1	POPULATION	Proportion of time spent on unpaid domestic and care work, male (% of 24 hour day)	SG.TIM.UWRK.MA

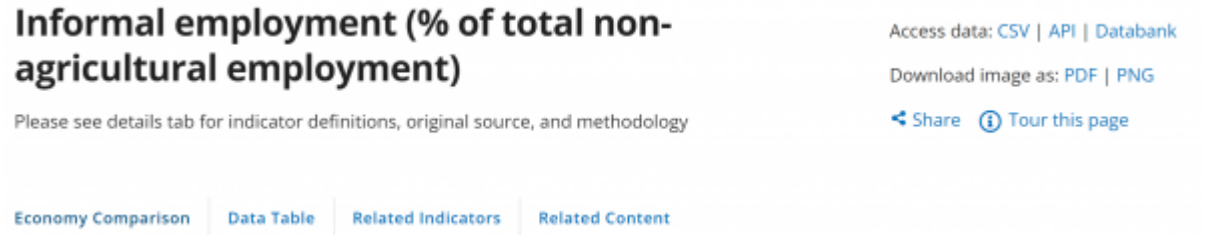
Data Pulling Instructions

1. You can either search up the indicator in the topics or search through them here in the all indicators page or download the entire dataset and filter it out for the data you need.
    1. NOTE: if you choose to download the entire dataset, note that the dataset has the years from 1960-2023/present but the series you are pulling may only have a specific timeframe (ie. 2000-2023). In this case it might be easier to just download the specific indicators so that you do not have to deal with extra years with NULL data.



2. Using the example informal employment, I can search up the indicator and click on it to take me to another page to download the data.





Data Notes

- GenderUnpaidDomesticWorkTimeFemale and GenderUnpaidDomesticWorkTimeMale are often pulled with the World Development Indicators.
