

Household Energy Database

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

Summary

The Household Energy Database monitors household energy use. The database contains nationally representative data from surveys and censuses on cooking, heating and lighting fuels. A proportion of the available surveys also include questions on stove type, time spent collecting fuel, and incidence of acute lower respiratory infection. The database is used to calculate national, rural and urban estimates for use of clean fuels and technologies (as well as the population affected), which WHO reports for Sustainable Development Goal Indicator 7.1.2. The database is regularly updated with new data from national censuses and large-scale household surveys such as the World Bank's Living Standard and Measurement Survey and UNICEF's Multiple Cluster Indicator Survey (MICS). The database is currently being upgraded in association with international and national surveys and censuses to include more data on heating and lighting fuels and technologies and emission rates, and to disaggregate data by sex and age whenever possible.

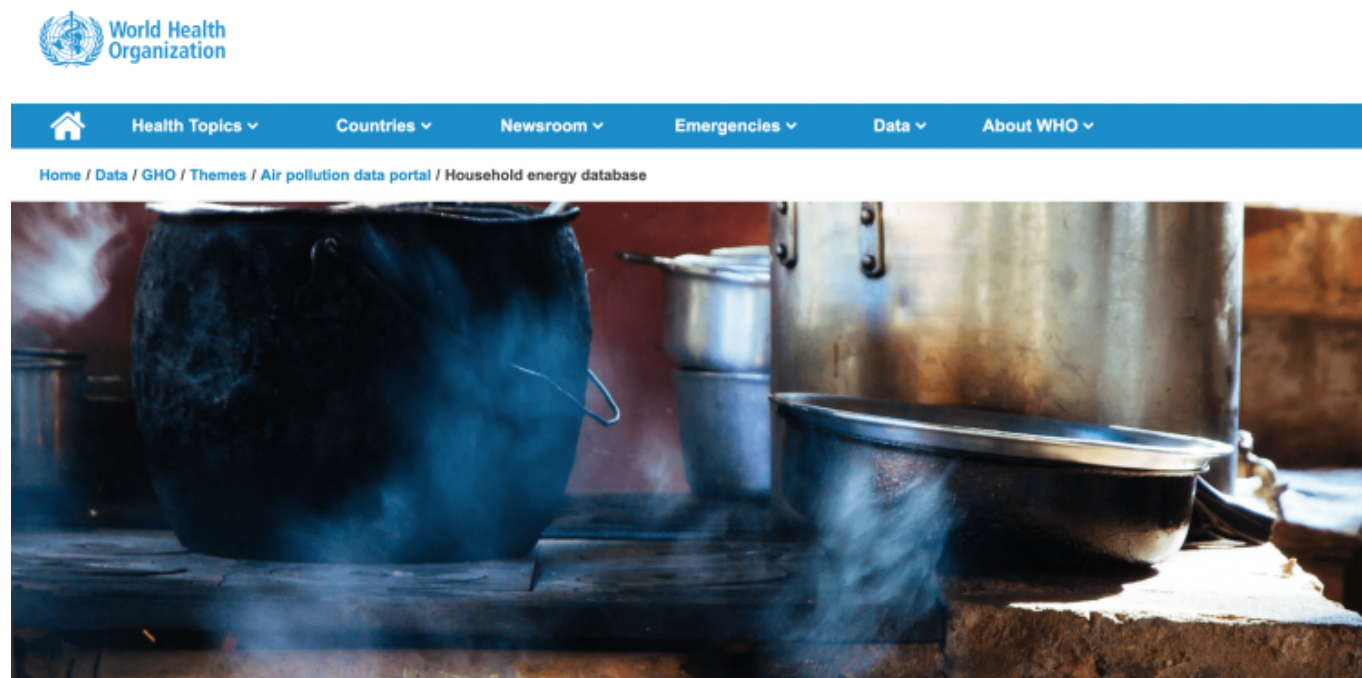

The Data Team uses the Household Energy Database for these series:

- **SeriesEnvSolidFuels**
- **SeriesEnvCookingFuelBiogas%HHTotal**
- **SeriesEnvCookingFuelBiomass%HHTotal**
- **SeriesEnvCookingFuelCharcoal%HHTotal**
- **SeriesEnvCookingFuelClean%HHTotal**
- **SeriesEnvCookingFuelCoal%HHTotal**
- **SeriesEnvCookingFuelCropWaste%HHTotal**
- **SeriesEnvCookingFuelDung%HHTotal**
- **SeriesEnvCookingFuelElec%HHTotal**
- **SeriesEnvCookingFuelKerosene%HHTotal**
- **SeriesEnvCookingFuelLNG%HHTotal**
- **SeriesEnvCookingFuelLPG%HHTotal**
- **SeriesEnvCookingFuelSolid%HHTotal**
- **SeriesEnvCookingFuelWood%HHTotal**

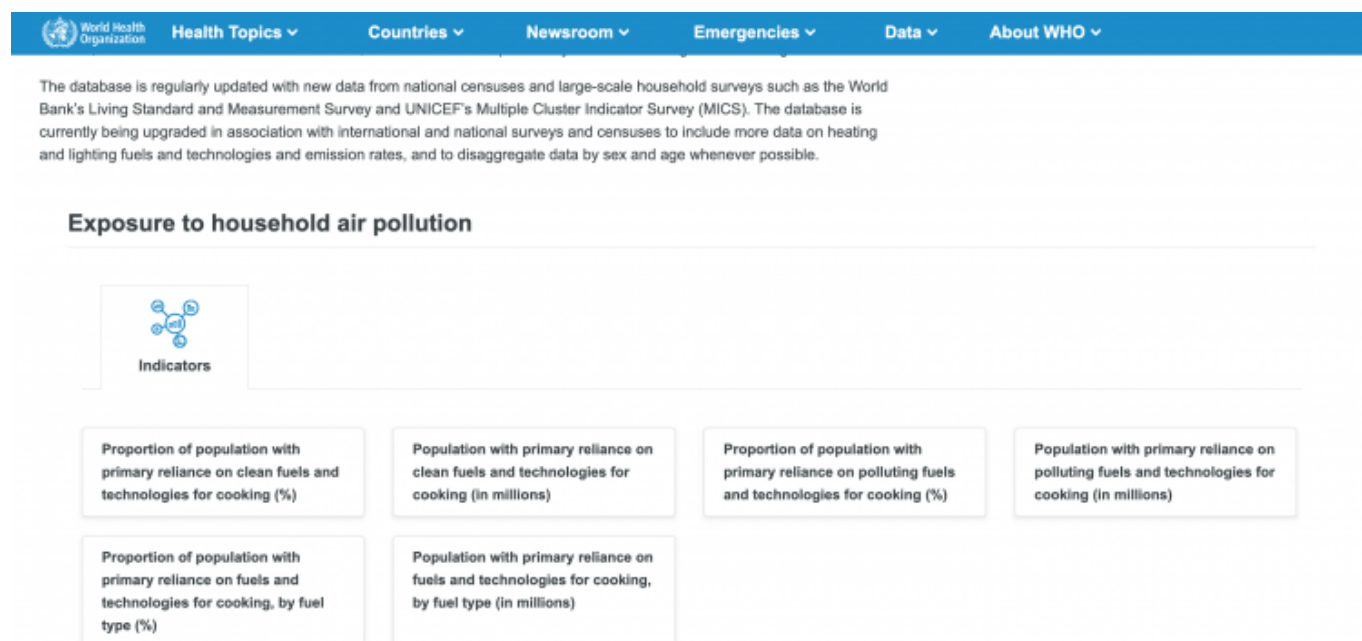

To pull data from the Household Energy Database for uploading into IFs, please follow the instructions below.

Steps to Pull Data From the Household Energy Database

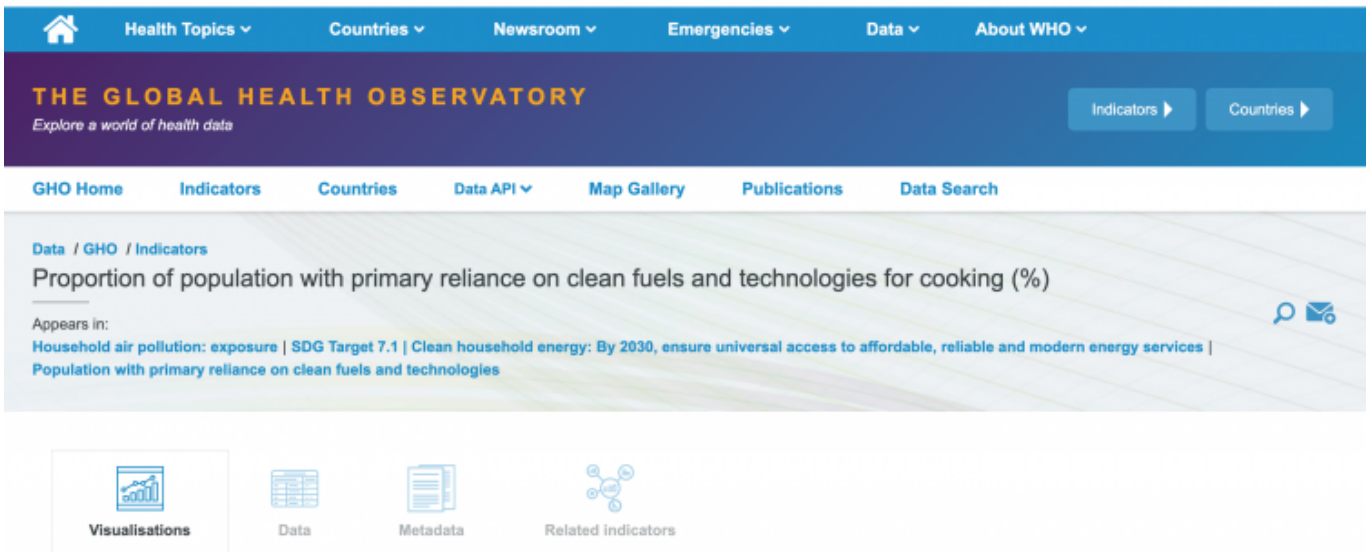

Step 1: Navigate to the Household Energy Database home page

Step 2: Scroll down to the indicators section and click the desired indicator. As an example, we will be looking for **population with primary reliance on clean fuels and technologies for cooking**.

You will be navigated here:

The screenshot shows the WHO Global Health Observatory website. The top navigation bar includes links for Home, Health Topics, Countries, Newsroom, Emergencies, Data, and About WHO. Below this is a dark blue banner with the text 'THE GLOBAL HEALTH OBSERVATORY' and 'Explore a world of health data'. A secondary navigation bar contains links for GHO Home, Indicators, Countries, Data API, Map Gallery, Publications, and Data Search. The main content area displays the indicator title 'Proportion of population with primary reliance on clean fuels and technologies for cooking (%)' and its context. At the bottom, a horizontal menu offers four options: Visualisations, Data, Metadata, and Related indicators. The 'Data' option is highlighted with a red border.

Step 3: Click the tab titled "Data"

This screenshot is identical to the one above, but with the 'Data' tab in the bottom navigation menu highlighted by a red border, indicating the next step in the process.

You will be navigated to this view:
