## General Pulling Instructions for IMFBoP

1. To pull from IMFBoP, first navigate to <https://data.imf.org/?sk=7A51304B-6426-40C0-83DD-CA473CA1FD52>

The screenshot displays the IMF Data website interface. At the top, the IMF logo and name are visible, along with navigation links for IMF.ORG, LIBRARY, BOOKSTORE, MCH DATA, DATASETS, DATA TOPICS, and HELP. Below this, a blue banner reads "IMF DATA ACCESS TO MACROECONOMIC & FINANCIAL DATA". The main content area is titled "Balance of Payments and International Investment Position Statistics (BOP/IIP)" and includes a "Latest Update Date: 08/24/2022" and "API" download options. A navigation menu below the title includes "BOP/IIP Home", "By Economy", "Data Tables", "Charts", "Query", "Documents", "Archive", and "About BOP/IIP". The main text area contains several paragraphs explaining the Balance of Payments and International Investment Position (IIP) concepts. A "What's New" section highlights new data series on separately identifiable cross-border flows and positions of SPEs. A "Charts and More Information" section lists links to "Economies Reporting on BPM6 Basis", "Economies Participating in the SPE Database", "Current Account Balance (Map)", and "Current Account Surplus - Top Ten Economies".

2. Click <Data Tables>

Balance of Payments and International Investment Position Statistics (BOP/IIP)

Economies Reporting on BPM6 Basis

Latest Update Date: 08/24/2022

BOP/IIP Home | By Economy | **Data Tables** | Charts | Query | Documents | Archive | About BOP/IIP

**The Balance of Payments** provides a framework that is applicable for a range of economies, from the smallest and least developed economies to the more advanced and complex economies. As a result, it is recognized that some items may not be relevant in all cases.

The balance of payments is a statistical statement that summarizes transactions between residents and nonresidents during a period. It consists of the goods and services account, the primary income account, the secondary income account, the capital account, and the financial account.

Under the double-entry accounting system that underlies the balance of payments, each transaction is recorded as consisting of two entries and the sum of the credit entries and the sum of the debit entries is the same.

The different accounts within the balance of payments are distinguished according to the nature of the economic resources provided and received.

The **International Investment Position (IIP)** is a statistical statement that shows at a point in time the value of financial assets of residents of an economy that are claims on nonresidents or are gold bullion held as reserve assets; and the liabilities of residents of an economy to nonresidents.

The difference between the assets and liabilities is the net position in the IIP and represents either a net claim on or a net liability to the rest of the world.

The IIP represents a subset of the assets and liabilities included in the national balance sheet. In addition to the IIP, the national balance sheet incorporates nonfinancial assets as well as financial assets and liability positions between residents.

**Special Purpose Entities (SPEs)** tables aim to separately identify selected cross-border flows (BOP) and positions (IIP) related to resident SPEs to support policy makers and analysts. SPE data series are disseminated on an annual basis as part of the existing balance of payments and IIP datasets on the IMF's data portal. Both annual and quarterly series are disseminated, where available.

**IIP Additional Analytical Position (Currency Composition)** tables provide, at a reference date, the currency composition of (i) debt claims and liabilities on/to nonresidents, (ii) financial derivative positions with nonresidents (receive/pay), by sector, and (iii) reserve-related liabilities. The currency split consists of domestic and foreign currency with further disaggregation into U.S. dollar, Euro, Yen, and other currencies. These data

**What's New**

New data series on separately identifiable cross-border flows and positions of SPEs are now available. Please refer to the Data Tables, Query or metadata reports to access the data and related information.

For questions, please take a look at our [knowledge base](#) or contact our Client Services Team by clicking **NEED HELP?** at the bottom right of this page.

7. When you find the specific indicator you are looking for, click the words of the indicator instead of the [+], and the table you are looking for will formulate. Keep in mind: On IMFBoP, Exports are referred to as Credit, while Imports are referred to as Debit. Typically, IMFBoP offers you the option to click credit or debit, OR click the [+] next to them for more specific indicators within them.

Below are two examples. If you want all Goods Import statistics, you will simply click <Debit> under the Goods tab. If you want Non-monetary Gold: imports, you will click <Non-monetary Gold: imports> under the Goods-->Debit tab.

10. Next, click “Excel Workbook (\*.xlsx)”

The screenshot shows a web application interface with a top navigation bar containing 'Report' and 'Home' tabs. Below this is a toolbar with 'Refresh', 'Autoupdate', 'Export', 'Controls', and 'Find' buttons. The 'Export' button is highlighted, and a dropdown menu is open, showing various file formats: 'Excel Workbook (\*.xlsx)', 'Excel Workbook 97-2003 (\*.xls)', 'PDF Document (\*.pdf)', 'Rich Text Document (\*.rtf)', 'PowerPoint Presentation (\*.pptx)', 'Web page (\*.html)', 'Web page, single file archive (\*.zip)', and 'Image (\*.png)'. The 'Excel Workbook (\*.xlsx)' option is selected, indicated by a red arrow. The main content area displays a table titled 'Balance of Payments Standard Presentation by Indicator: Current Account, Total, Net, US Dollars' with columns for years 2000 through 2008 and rows for various countries. The table data is as follows:

	2000	2001	2002	2003	2004	2005	2006	2007	2008

11. The following box formulates. Make sure the boxes next to “Charts as Images” and “Entire Report” are selected. Then, click <OK>

The screenshot shows the same web application interface as before, but with an 'Export options to XLSX' dialog box open in the foreground. The dialog box has the following options checked:

- Charts as images
- Entire report
- Quarterly

The 'OK' button is highlighted with a red arrow. The background data table is partially visible behind the dialog box.

12. The excel sheet will now download to your computer, and you can proceed with your pulling task.
