

Lesson Introduction

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This section provides "walk-through" lessons on the use of IFs. If possible, print the topic/lesson of interest to you and then follow it through carefully. It is usually best to proceed through the lessons in sequence. Take a look at the Purposes of IFs to learn about basic elements and functionalities of the IFs system, before you start these lessons.

Begin each lesson looking at the Main Menu of IFs, which you reach after you start IFs.

- How do I display information that comes with IFs and from already pe-packaged and pre-run scenarios? Lesson 1.
- How do I create an alternative scenario with IFs by changing one or more assumptions, running the model to compute the impact of the change, and displaying information from this run of the model? Lesson 2.
- How do I display and/or analyze data from the historic data set that comes with IFs? Lesson 3.
