Organization for Economic Cooperation and Development (OECD): Main Science and Technology Indicators (MSTI)

The OECD Main Science and Technology Indicators (MSTI), published twice yearly, provides a set of indicators that reflect the level and structure of the efforts undertaken by OECD member countries and eight non-member economies (Argentina, China, Israel, Romania, Russian Federation, Singapore, Slovenia, Chinese Taipei) in the field of science and technology. The indicators cover the resources devoted to research and development, patent families, technology balance of payments and international trade in highly R&D-intensive industries. See
