

Talk:Use IFs (Download): Health

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

The changes look good. However, we need to change the instructional nature of the language according to the guide we shared. Instead of saying "the user should click on" use "Click on" Please change this throughout the page. Also, if there is something that is no longer in IFs, add the warning we discussed. The source code needed is in the Guide, and I will also add it below. Put it at the start of the section explaining the no longer available feature in the source code.

Feature is no longer available or outdated in the model.
