You can download IFs Version 8.08 at 8.08.

Interface Updates

- Fix Unloading Project Data
- Fix Loading Project Data, it was always loading the first file.
- Fix on SDG form, continue out wasn't working when entering via context Main Menu map.
- Fix on Data Information, giving problems with GiniExtended from Longitudinal.

Model Updates

- Forcing Run to use English-US culture, to avoid error when processing scenario files in Operating Systems that use the "," as decimal separator, like the case of South Africa.
- Fixes for New Education Pre-processor, but still some issues left.
