You can download IFs Version 8.45 at IFs 8.45.

Interface Updates

- We only have room to show 305 years, so if we already have 81 years of forecast (2020 base with 2100 horizon), that leaves room for 224 years of history at most, so we can go back to 1796 at the earliest, unless we have a shorter base (2060), that could buy us some extra room (40 more years, so starting in 1756). Anyway for CARANN history plus forecast is only the UK that has data so early (1751), Canada starts in 1785, Other Europeans start a little later. For now we will only show as far as there's room in the max of 305 depending on the size of the run.
- Handling missing Groups in Scenario Tree: Deleting the line with missing Groups from Working.sce, but leaving it there for original scenario file, you will still get a message saying what Group is missing.

Model Updates

- Fix Load Project Data when loading many countries and years.
- Fix problem in Project Data for Countries with ' in the name like Cote D'Ivoire.
