- Fix problem with Change Multi-Variate function form, when clicking function it wasn't properly filtering only the coefficients for that particular function, example: Coeff. of Var. - Fixes to Formulas with Incompatible files, like base case 7.93 that still didn't include Sahrawi and Kirivati. Trying Poverty as Percentage of Population. There were also problems when using Decompose in regular variables.
- Fix to displaying variable lists in Self-Managed.
- Fix to displaying R2 for regressions in Forecast.
