Version 8.57 (December 12th, 2025)

[PREVIOUS VERSION](#) | [INDEX PAGE](#)

You can download IFs Version 8.57 at IFs 8.57.

Interface Updates

- Fix to calculate the starting year value correctly where only forecasted values are available, when the "Use all available history data" is turned on.
- Increased font size for labels in Pyramids.
- In graphical display, base-year vertical line now appears by default when the start year in graph is less than the base year.

Model Updates

- Added new variable to display intersectoral flows in Flex Displays: INTSFLOWS.
- Fixed problem with rebasing to 1995 in function estimateHistory.
- We have changed the adjustments made to the Agriculture (and Energy) Column in the SAM, were previously any change introduced into Gross Production by changing ylm (or enmpm) was being proportionally distributed to All the sectors in the Intersectoral Flows, but now we are NOT passing that change to the Sectors, so all of it goes to VADD, as if it was purely coming from an improvement in technology. This helps solve a problem where we were seeing reductions in Gross Production of other sectors by this intervention alone, caused by reducing the relative weight of other sectors relative to the new total, specifically for Iraq. Also added parameters outputagprotect and outputenprotect, when using a multiplier on Yield or Energy Production, and this parameter is 0 (default) the sectoral flows are protected and 0 effect is transferred to it, but if it is 1, the full effect is

passed to the sectoral flows, values between 0 and 1 can also be used for proportional effect.

- Added Monadic Leader Travel (LDRTRIP, LDRTRIPOUT, ldrtripm).

Data Updates

- 49 Tables inserted & updated in IFsHistSeries
- 7 preprocessors updated, poverty data from PIP
- 14 tables updated, Diplometrics
- 7 new tables, civil war impact from JDM, can be searched by SFCivilWarPardee
- 10 preprocessors updated, FAO land use
- 1 preprocessor updated, FreedomHouse
- 6 preprocessors updated, GDP hist+forecast from WDI+IMF (2025Oct release)
- 3 tables updated, life expectancy from IHME
- 1 preprocessor updated, CO2 emission from CDIAC
- 7 Rows updated in DataDict
- Agg rules added for 5 rows according to GitHub ticket 355
- Agg rules changed from SUM to GDP for 2 diplo tables (arms trade % GDP)
