Summary

The IMFWEO (International Monetary Fund World Economic Outlook) Report is a survey conducted by the IMF staff that is published twice a year both in report and database format. The historical data and projections are based on the information gathered by the IMF country desk officers in the context of their missions to IMF member countries and through their ongoing analysis of the evolving situation in each country. Historical data are updated on a bi-annual basis, typically in April and September/October, as more information becomes available. IMF staff estimates serve as proxies for historical series when complete information is unavailable. As a result, WEO data can differ from other sources with official data, including the IMF's International Financial Statistics.

Tables In IFs

Variable	Definition	UsedInPreprocessor	UsedInPreprocessor	FileName	Code in Source
GovtGenGDebt%GDPFM	Gross debt, General government, Percent of GDP	0			GGXWDG_NGDP.A
GovtGenNDebt%GDPFM	Net debt, General government, Percent of GDP	0			GGXWDN_NGDP.A
GovtGenExp%GDPFM	Expenditure, General government, Percent of GDP	1	ECONOMY		GGX_NGDP.A
GovtGenRev%GDPFM	Revenue, General government, Percent of GDP	1	ECONOMY		GGR_NGDP.A

Data Pulling Instructions

Step 1: To pull WEO data, first navigate to the WEO Databases page

Data Notes

If you are downloading the excel or CSV file for the data, some countries spelling gets messed up (ex. Côte d'Ivoire, "São Tomé and Príncipe", Türkiye) and need to be changed to match to the IMF WEO Countries naming conventions before importing them to the IFs Database.
