

File:Section 5 Equation 3 in 5.4.2.1 Basic Export calculation.png

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

After saving the gravity function-linked value for use in the next year, the calculated value can be adjusted in multiple ways, beginning with the scenario option for users to multiply the before-constraint value for any dyad for scenario analysis purposes by a parameter (tradeexportdyadm) that has a default value of 1.0.
