

# IMF Global Debt Database

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

## SUMMARY

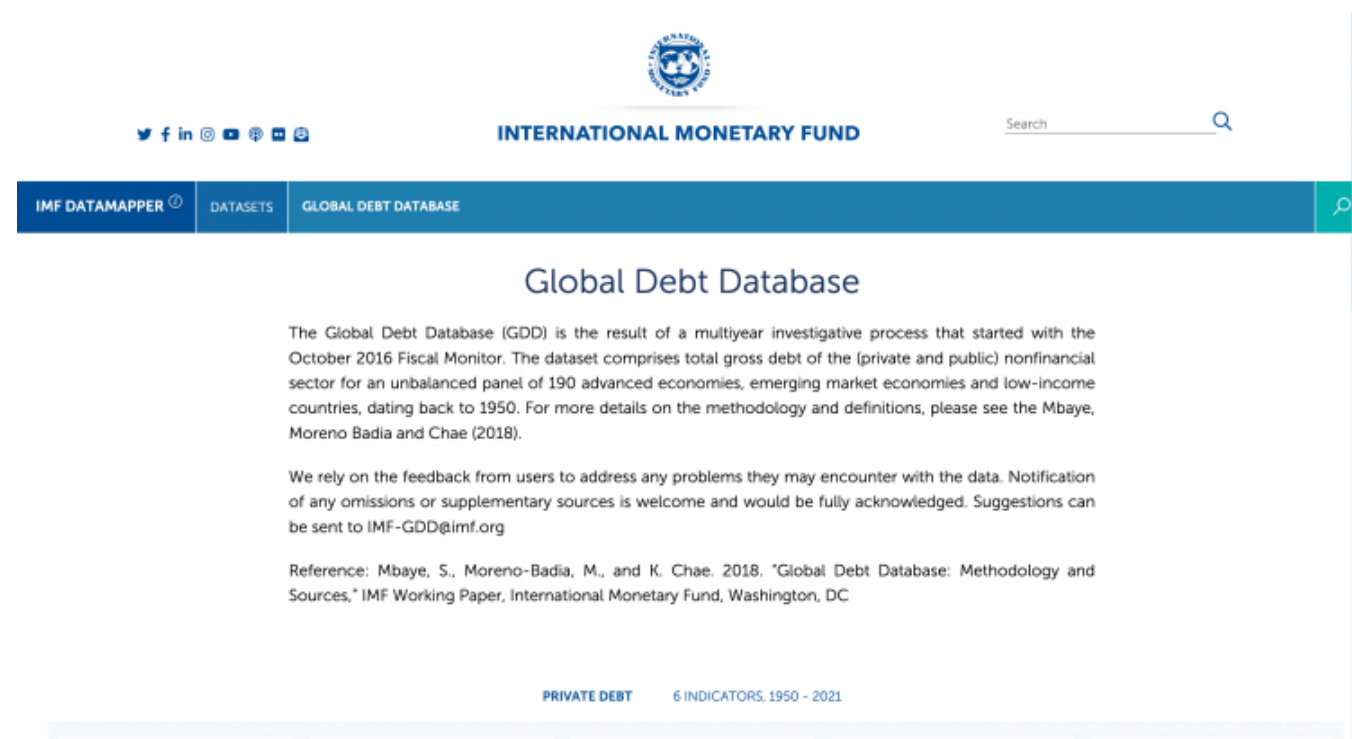

The Global Debt Database (GDD) is the result of a multiyear investigative process that started with the October 2016 Fiscal Monitor. The dataset comprises total gross debt of the (private and public) nonfinancial sector for an unbalanced panel of 190 advanced economies, emerging market economies and low-income countries, dating back to 1950. Both the private and public indicators that make up the GDD have a range from 1950-2021 and therefore are not updated any further.

The Data Team uses the GDD for series such as **SeriesGovtDebt%GDPIMF** and **SeriesGovtDebtGen%GDPIMF**, which both measure Government Debt.

For instructions on how to pull data from the GDD, refer to the instructions below.

## STEPS TO PULL FROM GLOBAL DEBT DATABASE

Step 1: Navigate to the Global Debt Database Home Page

The screenshot shows the IMF Global Debt Database Home Page. At the top, there is a navigation bar with the IMF logo, social media icons, the text "INTERNATIONAL MONETARY FUND", a search bar, and a "Search" button. Below the navigation bar is a blue header with the text "IMF DATAMAPPER", "DATASETS", and "GLOBAL DEBT DATABASE". The main content area is titled "Global Debt Database" and contains a paragraph describing the database, a note about feedback, and a reference. At the bottom, there is a footer with the text "PRIVATE DEBT" and "6 INDICATORS, 1950 - 2021".

### Global Debt Database

The Global Debt Database (GDD) is the result of a multiyear investigative process that started with the October 2016 Fiscal Monitor. The dataset comprises total gross debt of the (private and public) nonfinancial sector for an unbalanced panel of 190 advanced economies, emerging market economies and low-income countries, dating back to 1950. For more details on the methodology and definitions, please see the Mbaye, Moreno Badia and Chae (2018).

We rely on the feedback from users to address any problems they may encounter with the data. Notification of any omissions or supplementary sources is welcome and would be fully acknowledged. Suggestions can be sent to IMF-GDD@imf.org

PRIVATE DEBT 6 INDICATORS, 1950 - 2021

Step 2: Scroll down and click the desired indicator (ex. General Government Debt)

The screenshot shows the IMF Global Debt Monitor interface. At the top, there's a section for 'PRIVATE DEBT' with 6 indicators from 1950 to 2021. Below it, the 'PUBLIC DEBT' section has 4 indicators from 1950 to 2021. The 'General Government Debt' indicator is highlighted with a red box. At the bottom, there's a footer with links to 'GLOBAL DEBT MONITOR', 'DATASET', 'METHODOLOGY', and 'FEEDBACK'.

PRIVATE DEBT 6 INDICATORS, 1950 - 2021

- Private debt, loans and debt securities
- Household debt, loans and debt securities
- Nonfinancial corporate debt, loans and debt securities
- Private debt, all instruments
- Household debt, all instruments

PUBLIC DEBT 4 INDICATORS, 1950 - 2021

- Central Government Debt
- General Government Debt**
- Nonfinancial Public Sector Debt
- Public Sector Debt
