SUMMARY

OECD Data Explorer (Old version: OECD.Stat) is the Organisation for Economic Co-operation and Development's database, housing data on a variety of indicators, including those on agriculture, development, labor, and international trade. OECD Data Explorer collects data on both member and non-member countries for indicators on development, agriculture, education, and a myriad of additional economic variables. (OECD.Stat has reached the end of its life and will be switched-off end of March 2024.)

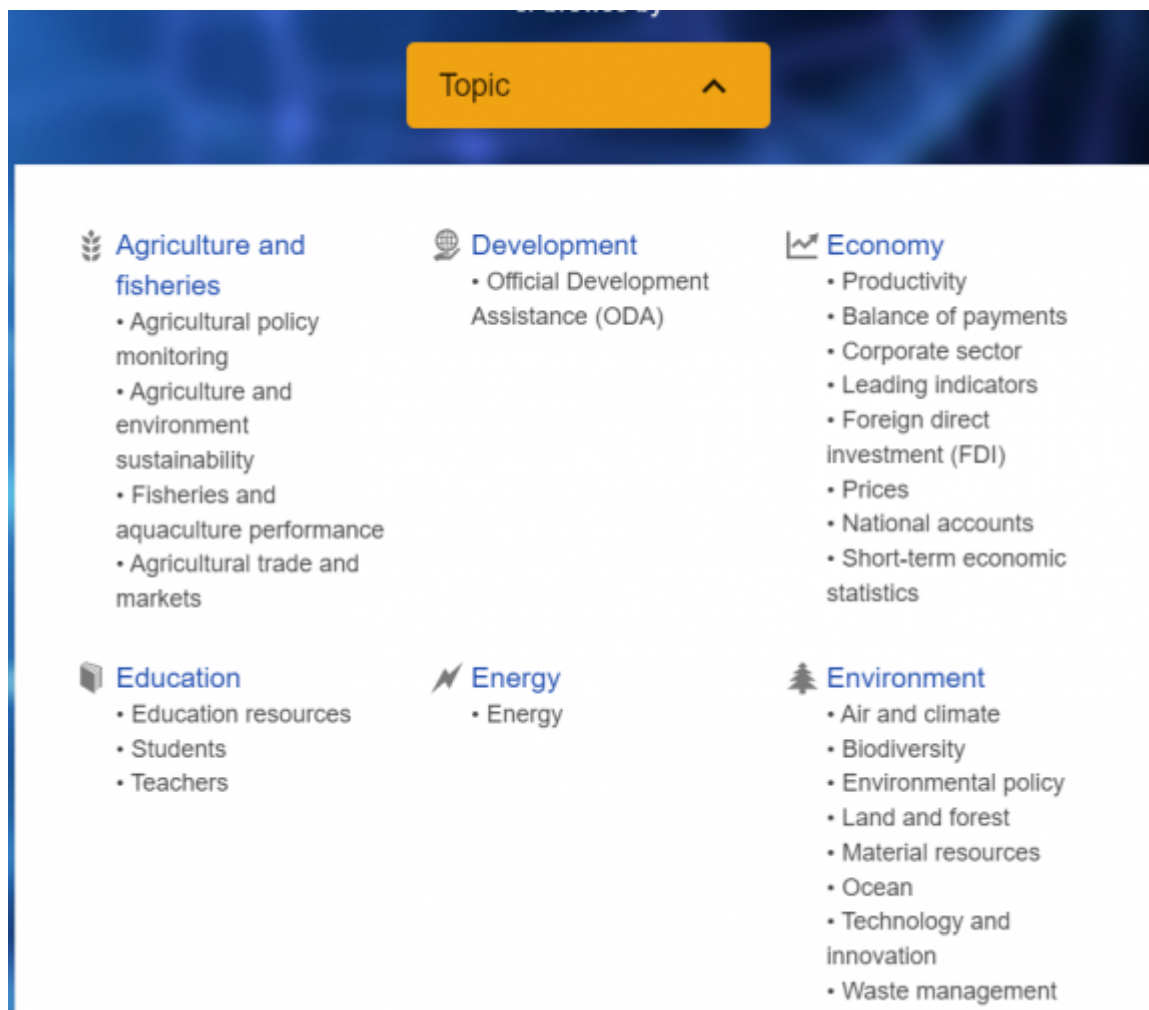

To pull data, please follow the instructions below.

GENERAL STEPS TO PULL DATA FROM OECD Data Explorer

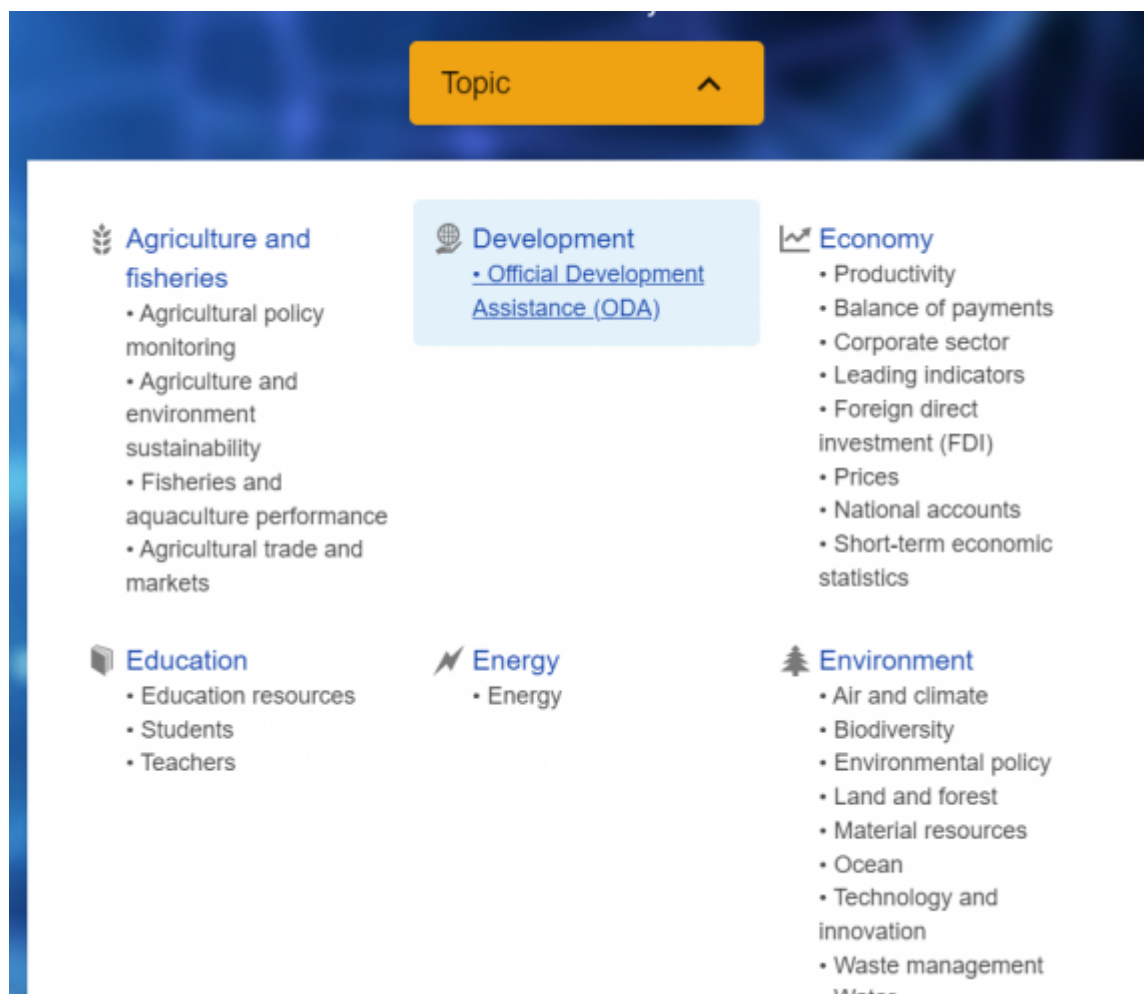

Step 1.) Navigate to the home page of OECD Data Explorer

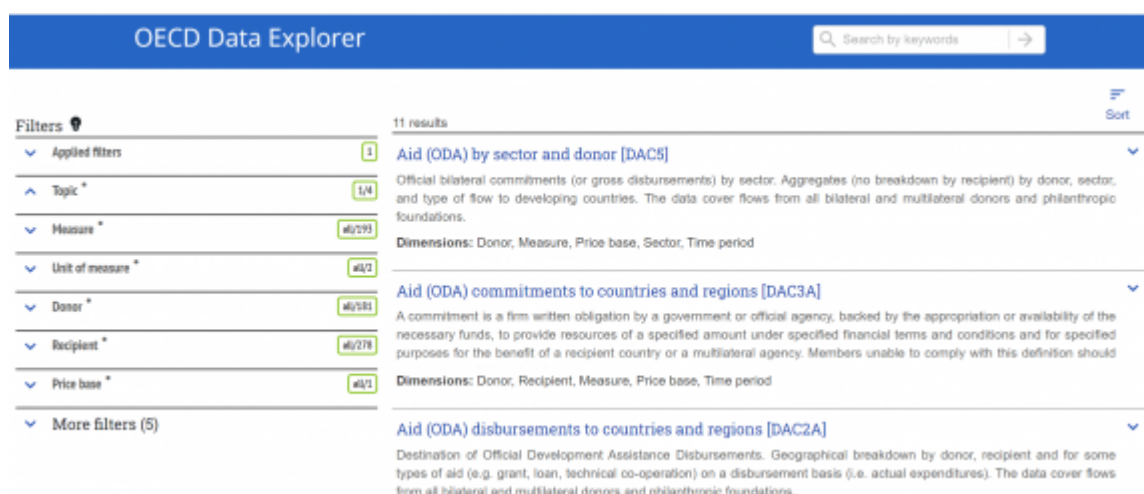

Step 2.) Choose one of the themes below pick a topic area

Step 3.) Select a sub theme within your selected theme (e.g. Official Development Assistance (ODA))

Step 4.) Select an indicator within that sub theme (e.g. Aid (ODA) disbursements to countries and regions [DAC2A])

Step 5.) Once you have selected an indicator, you can use "Filters" on the left to select which countries you would like to see data on, or other customization options (e.g.

"Recipient" is the country option for Aid (ODA) disbursements to countries and regions [DAC2A])

The screenshot shows a data portal interface. On the left, under 'Filters', there are sections for 'Time period' (10/63), 'Donor' (11/177), and 'Recipient' (11/277). The 'Recipient' section is expanded, showing a search bar and a list of categories: 'All recipients', 'Developing countries', and 'Europe'. Under 'Europe', there are checkboxes for 'Albania', 'Belarus', 'Bosnia and Herzegovina', 'Croatia', and 'Cyprus'. At the bottom, the 'Measure' section shows '1/24'. On the right, under 'Applied filters', there are tabs for 'Measure' (selected), 'Unit of measure' (US dollar), and 'Price base' (Constant prices). Below the filters, there are icons for 'Overview', 'Table', 'Chart', 'Labels', 'Download', 'Developer API', and 'Full screen'. The main content area displays 'Aid (ODA) disbursements to countries and regions [DAC2A]' with a description, unit of measure, donor/recipient/measure/price base, topic, total number of available data points, last updated date, and a list of related data items.

Step 5.1) To change the selection mode to select all countries easily, you need to "Use advanced selection modes".

The screenshot shows the 'Recipient' filter section. At the top, there is a search bar labeled 'Search in all items' and a button labeled '1/277'. Below the search bar, there is a list of countries with checkboxes: 'India', 'Indus Basin', 'Kazakhstan', 'Kyrgyzstan', 'Maldives', 'Myanmar', 'Nepal', and 'Pakistan'. A red circle highlights a button labeled 'Use advanced selection modes' located below the list of countries. To the right of the list, there is a vertical scrollbar. On the far right, there is a sidebar with links to 'Overview', 'Aid (ODA) disbursements to countries and regions [DAC2A]', 'Destination of Official Development Assistance Disbursements', 'Unit of measure', 'Donor', 'Topic', 'Total number of available data points', 'Last updated', and 'You might also be interested in these data:'.

Step 5.2) Select Change selection mode

Recipient X

Change selection mode ▾

Aid (ODA) disbursements to count

Filtered data in tabular text (CSV)

Unfiltered data in tabular text (CSV)

Destination of Official Development Assistance (ODA) by donor, recipient and for some types of aid (e.g. concessional loans, grants, etc.) on a

disbursement basis (i.e. actual expenditures). The data cover flows from all bilateral and

multilateral donors and philanthropic foundations.

Unit of measure: US dollar

Donor • Recipient • Measure • Price base

Topic: Development > Official Development Assistance (ODA) > Flows by provider and recipient

Total number of available data points: 8998970

Data by Topic

Development

Official Development Assistance (ODA)

Flows by donor (ODA+OOF+Private) [DAC1]

- Official and Private Flows - Disbursements and Commitments. Aggregate data (no breakdown by recipient) on ODA, OOF, private and NGO data by donor, type of aid and flow. The data cover flows from DAC member countries, EU Institutions and non-DAC providers.
 - Definition of Net ODA: Official development assistance (ODA) is defined as government aid designed to promote the economic development and welfare of developing countries. Loans and credits for military purposes are excluded. The OECD maintains a list of developing countries and territories; only aid to these countries counts as ODA. The list is periodically updated and currently contains over 150 countries or territories (see DAC List of ODA Recipients: <https://oe.cd/dac-list>).(From: <https://data.oecd.org/oda/net-oda.htm>)

AidDon%GNI:

- Time Period: 1960 – 2022
- Donor: DAC countries (Whole Branch)
- Measure: ODA as percent of GNI, grant equivalent & ODA as percent of GNI, net disbursements
- Flow type: Disbursements, net & Grant equivalents
- Unit of measure: Percentage of gross national income
- Price base: Unselect Constant prices (**Note:** Change it first, if the default selection limit the selection on Measure)

- *Note: Prior to 2018, the ODA flows basis methodology covered loans expressed on a “cash basis”, meaning their full face value was included, then repayments were subtracted as they came in. From 2018, the ODA grant-equivalent methodology is used whereby only the “grant portion” of the loan, i.e. the amount “given” by lending below market rates, counts as ODA.*

Aid (ODA) disbursements to countries and regions [DAC2A]

- Destination of Official Development Assistance Disbursements. Geographical breakdown by donor, recipient and for some types of aid (e.g. grant, loan, technical co-operation) on a disbursement basis (i.e. actual expenditures). The data cover flows from all bilateral and multilateral donors and philanthropic foundations.

AidRec%GNIOECD, AidRecGrants%GNI, AidRecLoanGross%GNI, AidRecLoanNet%GNI, AidRecLoanRepay%GNI, AidRecRecover%GNI

- Unit: Millions (to calculate the series, need to *1000000)
- Unit of measure: US dollar
- Use the values from OECD to be divided by GNI (Current US\$):

OECD Home > Economy > Economic outlook, analysis and forecasts > Statistical Annex

Statistical Annex

This annex contains data on key economic series which provide a background to the recent economic developments in the global economy described in the main body of the OECD Economic Outlook. Data in some of the tables have been adjusted to conform to internationally agreed concepts and definitions in order to make them more comparable cross countries, as well as consistent with historical data shown in other OECD publications. Regional aggregates are based on time-varying weights.

For details on aggregation, see [OECD Economic Outlook Sources and Methods](#).

The OECD projection methods and underlying statistical concepts and sources are described in detail in [OECD Economic Outlook Sources and Methods](#).

[Contingenda for the current and earlier issues](#)

Note on quarterly projections: OECD quarterly projections are on a seasonal and working-day-adjusted basis for selected key variables. This implies that differences between adjusted and unadjusted annual data may occur, though these in general are quite small. In some countries, official forecasts of annual figures do not include working-day adjustments. Even when official forecasts do adjust for working days, the size of the adjustment may in some cases differ from that used by the OECD.

The data below was released 29 November 2023.

[Economic Outlook Online Database](#) or as [PDF](#) | [Excel](#) | [Economic Outlook 114 Annex](#)

Addendum: This web version of the Economic Outlook Annex has been updated to reflect the following change to the version published online on November 29, 2023: Correction of the figures for the Annex Table 29: Central bank policy rates.

Demand and output <ol style="list-style-type: none"> 1. Demand and output for selected economic areas and country groupings 2. Real GDP 3. Nominal GDP 4. Real private consumption expenditure 5. Real public consumption expenditure 6. Real total gross fixed capital formation 7. Real gross private non-residential fixed capital formation 8. Real gross residential fixed capital formation 9. - Click Fiscal balances and public indebtedness. (Download File: EO114_Fiscal-balances-and-Public-Indebteness.xlsx)
- Use Tab: 'Total Outlays'
- The current series in IFs goes from 1993 to 2017. This was a simple update that replaced 2010-2017 with more refined and current data and added 2018-2025 forecasts to the series.
