SUMMARY

The UNDP datasets are from UNDP's Human Development Data. The United Nations Development Programme contains human development data from 1990-2021 on a global, regional, and country/territory-level. Each indicator is linked to Sustainable Development Goals (SDGs). UNDP is useful for tracking human progression as it relates to SDGs and growth. The indicators are updated annually, and annual data is provided in them.

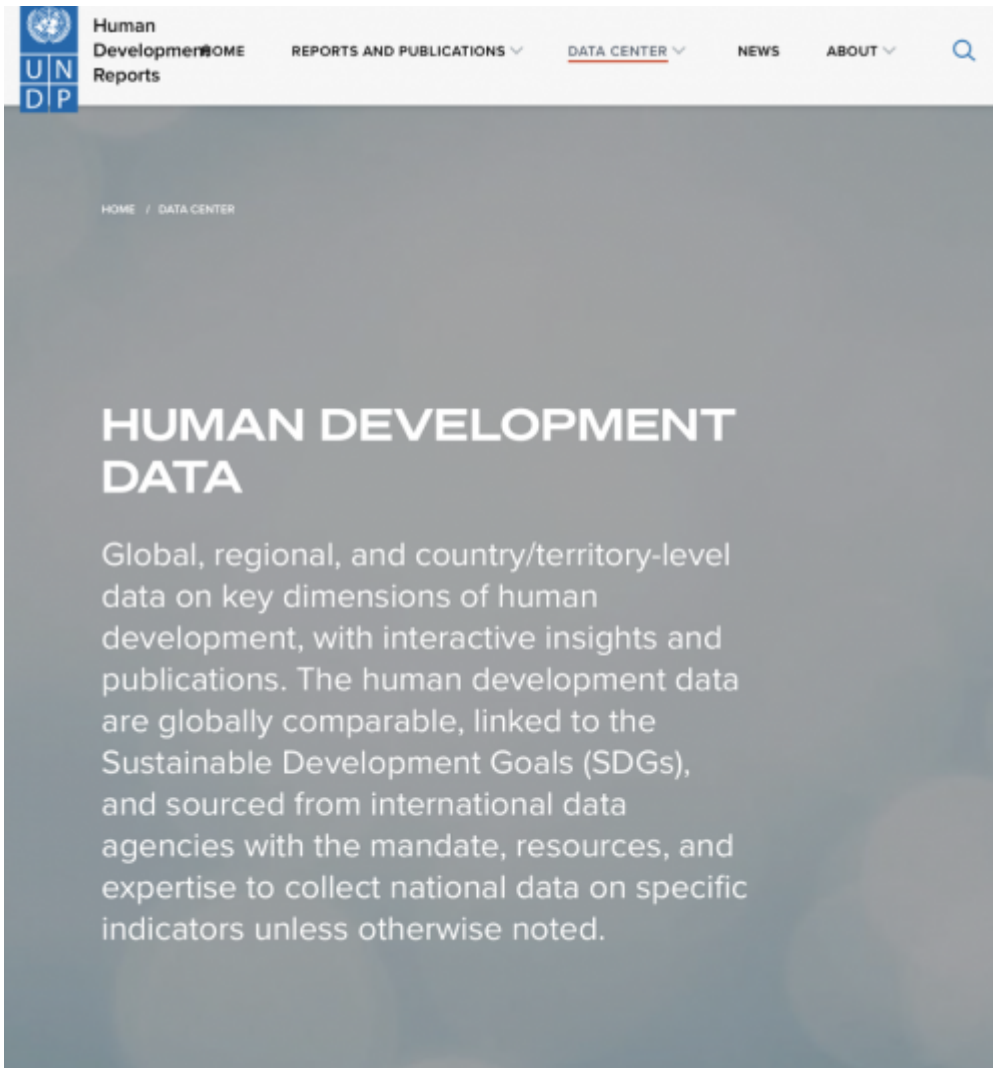

Primarily, the data team uses this dataset for a couple indicators:

- Education
- Gender Inequality and Development
- Environmental Efforts

For example, SeriesEdYearsAge25UNHDRO and SeriesEnvPaperRec%.

STEPS TO PULL DATA FROM UNDP

1. To pull from UNDP United Nations Development Programme, first navigate to <https://hdr.undp.org/data-center>

UNDP Pull Step 1

2. Scroll down. Under the header “What’s inside” click the box “Human Development Index (HDI).”

What's inside

Human Development Index (HDI)

The HDI is a summary measure for assessing long-term progress in three basic dimensions of human development: a long and healthy life, access to knowledge and a decent standard of living.

MORE INFORMATION ON THE HDI >

Country Insights

An interactive data visualization summary of achievements in human development for 191 countries and territories, across human development indices including the HDI and complementary measures that estimate gender gaps, inequality, planetary pressures, and poverty (covering developing countries).

VIEW DATA BY COUNTRY >

Thematic Composite Indices

The human development composite indices have been developed to capture broader dimensions of human development, identify groups falling behind in human progress and monitor the distribution of human development. In addition to the HDI, the indices include Multidimensional Poverty Index (MPI), Inequality-adjusted Human Development Index (IHDI), Gender Inequality Index (GII), and Sustainable Development Index (SDI).

Thematic Dashboards

In addition to the composite indices, statistical dashboards have been developed to consolidate multiple indicators to evaluate progress of human development by highlighting levels and changes of various indicators. The latest HDR features five colour-coded dashboards covering five topics: quality of human development, life-course gender, planetary pressures, poverty, and inequality.

UNDP Pull Step 2

3. On the “Human Development Index (HDI)” page, scroll down and click “Downloads and Documentation”

The screenshot shows the top navigation bar of the Human Development Reports website, including links for HOME, REPORTS AND PUBLICATIONS, DATA CENTER, NEWS, and ABOUT. Below the navigation bar, a diagram illustrates the components of the Human Development Index (HDI). It shows 'Knowledge' leading to 'Expected years of schooling' and 'Mean years of schooling', which both contribute to the 'Education index'. 'A decent standard of living' leads to 'GNI per capita (PPP \$)' and 'GNI index', which both contribute to the 'HDI Human Development Index'. A red arrow points from the 'Downloads and documentation' section to the 'GNI per capita (PPP \$)' indicator. The 'Downloads and documentation' section includes the text 'Explore related resources to better understand human development data and concepts.' and a link 'SEE DOWNLOADS AND DOCUMENTATION >'. Below this, there is a 'Human Development News' section with a headline 'International Migrants' Day Event: Exploring migration and human security' dated 'December 14, 2022' and a corresponding image.
