Version 8.19 (March 14th, 2024)

Version 8.19 (March 14th, 2024)

You can download IFs Version 8.19 at IFs 8.19.

Interface Updates

- Fix to Drop existing tables in iFsDataImport.db file when having special character like %. Also allowing Years to be in a different column when using Format 2. Removing tables from ifsDataImport.db when clicking Cancel in View Data form.
- Fix to Scenario tree when customizing sfintlwaradd.
- Fix refreshing scenario results from cache (Clear session dataframes and files when saving a run file).
- Fix on Population and Education pyramids, they were not changing scenarios.
- Update to Poverty Display to use 2017 PPP levels.
- Fix incompatibility of Trillion and Billion dollars in graph title.

Model Updates

- Adding Exogenous forecast for Corruption and Government Effectiveness.
- Handling negatives for COOKSTOVES(ModernFuel) when using negatives in cookstoveadd parameter.
- Value Added to Labor data reconciliation using new GTAP 11 data.
- Fix absolute exogenous type for GDPPCP when base year doesn't exist in table.
- Kiribati is now included in HealthDetailedDeathsCtry, no need to use Tonga as a proxy anymore

Data Updates

- 40 Tables inserted & updated
  - 7 energy prod & reserve updated, and elec tables from BP Energy Outlook.
  - 21 IHME tables updated, including demographic indicators, health related indicators, and social violence indicators.
  - 10 new tables, Gov effectiveness and corruption by SSPs. Scales are the same to variables in IFs (0-10 & 0-5).

- Manually fixed 0s in GovtEdPub%GDP (replaced with newly released values from WDI).
- Manually fixed column names in PopMigration.
- Data source entries for 55 SSP tables are now updated.
- Notes: HealthDetailedDeathsCtry in the IFs.db is also updated.
