Version 8.22 (May 1st, 2024)

You can download IFs Version 8.22 at IFs 8.22.

Interface Updates

- Fix comparison of scenarios in Pyramids.
- Fix Pyramids when changing scnearios.
- Fix on Cross-Sectional using tables with lots of years, like PolityCombined.
- Using exe instead of dll, and stop the flickering in Run form.
- Fixes in Longitudinal and Cross-Sectional when using WVS

Model Updates

- Using exe instead of dll
- Added six parameters for changing inputs in the intersectoral flows: inputagrim, inputenerm, inputictm, inputmanum, inputmatem, inputservm. These are multipliers that work on the inputs computed using the i-o tables. Values less than 1 reduces the input and values greater than 1 increases them. The parameters are two dimensional: country/region and sector. For example, a value of .5 for inputmatem for the World, manufacturing will reduce the material input in manufacturing sector production by 50% for all countries. If you choose Total in the second dimension for inputmatem, material input will change in all sectors.

Data Updates

- Fix to ifsVar, we had lost the descriptions and units that indicated we're now using 2017$ instead of 2011$
- 4 Tables inserted & updated
  - 1. 2 new tables on ICT service trade shares, SeriesICTSerExport%ExpSer & SeriesICTSerImport%ImpSer
  - 2. Renamed 2 current preprocessors on ICT goods trade shares. New names are SeriesICTGoodsImport%ImpGoods & SeriesICTGoodsExport%ExpGoods
- 71 Tables inserted & updated
  - 1. 2 new tables on ICT service trade shares, SeriesICTSerExport%ExpSer & SeriesICTSerImport%ImpSer
  - 2. Renamed 2 current preprocessors on ICT goods trade shares. New names are SeriesICTGoodsImport%ImpGoods & SeriesICTGoodsExport%ExpGoods
  - 3. 60 new tables from IIASA's SSP 3.0 release.
  - 4. 6 new tables, standardized GINI by market or disposal income.   They can be searched by "SWIID".
  - 5. DiME table updated. Scale changed from 0-1 to 0-100.
  - 6. 3 tables EdYearsAge25, from WIC 3.0. Values extended to 2020.
